WORK EXPERIENCE

FRONT END DEVELOPER

Dearest.io | January 2019 - Present

- Coordinate with lead developer to implement new features for public and admin site
- Maintain, refactor, and modularize codebase to increase performance and readability
- Create functions and GraphQL queries to pull and aggregate the necessary information from MongoDB in a coherent manner to display
- Debug errors ranging from UI bugs to performance bugs
- Focus on build and updating website using React, Javascript, CSS, and Flexbox

ENROLLMENT COORDINATOR

Extended Managed Long Term Care | October 2016 – December 2016

- Served as the first point of contact and completed pre-enrollment screening forms for potential enrollees
- Minimized data duplication through spreadsheets; saved administrative time and increased consistency
- Backfill lost appointments due to assessment cancellations and last-minute rush

PROJECTS

CAPSTONE - SUSHI GO

Developer | February 2018

- Mobile application that emulates the card game Sushi GO
- Created using React Native and Socket.io
- Responsible for game logic such as front end design

AVALON SETUP

Developer | January 2018

- Interactive mobile application that narrates and adjusts the character script depending on the number of players
- Created using React Native
