TECHNOLOGY
- **Proficient**: HTML, CSS, JavaScript, React
- **Knowledgeable**: Sequelize, Redux, , Flexbox, React-native, Express, Git, Github, Node.js
- **Some experience**: C, Ruby, SQL, React-Redux, Socket.io, JQuery, Bootstrap

PROJECTS
- **Capstone** - Sushi Go | Developer | February 2018 | https://github.com/1710-Capstone-SushiGo/SushiGo
  Sushi Go is a card game where each player pick a card and passes the rest of their hand to the next person. The player with the most points at the end of the game win.
  - A mobile app that emulates the game that can be played with up to 4 players
  - Created using React Native and Socket.io
  - Responsible for game logic and front end design
- **Avalon Setup** | Sole Developer | January 2018 | https://github.com/williamlee21/AvalonSetup
  Avalon is a game of deception where each player is to figure out the identity of the other players
  - A mobile app that narrates and adjusts the character script depending on who is playing
  - Created using React Native
  - Challenges: learning react native syntax and figuring out text to speech

EXPERIENCE
Extended Managed Long Term Care   **October 2016 – December 2016**
Enrollment Coordinator   *Staten Island, NY*
- Served as first point of contact to interested parties for potential enrollees and completed pre-enrollment screening forms for potential enrollees
- To counter an ongoing problem with assessment cancellations and last-minute rush, acted quickly to backfill lost appointments
- Minimized data duplication though spreadsheets; saved administrative time and increase consistency
- Leveraged share data file to eliminate over-scheduling issues

EDUCATION
Fullstack Academy of Code   **October 2017 – February 2018**
- Immersive 3 month software development program

Hunter College   **August 2011 – January 2015**
